

Procedure for travelers entering Monaco as of June 25, 2020

Any person, regardless of nationality, who enters the Principality and does not come from European Area (EU states, United Kingdom, Switzerland, Norway, Iceland, the Holy See, Liechtenstein, Andorra and San Marino) are required to contact the COVID19 Call Centre prior to travel to Monaco (+377.92.05.55.00 9 a.m. to 5:30 p.m. / covid19@gouv.mc).

The COVID19 Call Centre will need to collect the following information:

- First and last name of the traveler(s)
- Nationality
- Domicile or address in the Principality
- Occupational status and, if applicable, the employer's name
- Provenance/departure origin
- Travel Dates (Departure date, return/arrival date)
- Phone number
- Email address

The COVID 19 Call Centre will systematically propose the implementation of a PCR test, and results will be reported to: meddepistage@gouv.mc.

Note that this test remains the responsibility of the person concerned.

It should also be noted that if the latter justifies the realization of a PCR with negative result (within less than 72 hours) carried out in his country of origin, no quarantine measures will be carried out, to be implemented by the Director of Health Action.

A report of this person will be made to the Director of Health Action who will establish a quarantine decision from the date of the person's return.

In the event of a negative PCR, the Director of Health Action will make a decision to lift Quarantine.

In the event of a positive PCR or if the person refuses to be tested, the decision to implement quarantine will remain effective, with the need for a work stoppage certificate.

All persons entering this procedure will be asked in the event of the appearance of symptoms to contact the COVID19 Call Centre immediately at +377.92.05.55.00 from 9am to 5:30 p.m. or 18 or 112 outside these hours.
