Anyone, whatever their nationality, who enters the Principality and comes from either:

- from a country outside the European Area
- a region of a country in the European Area, excluding mainland France, for which the cumulative incidence over 14 days is greater than 60 cases per 100,000 inhabitants, (cf. https://www.diplomatie.gouv.fr/fr/travel-advice)

must be attached to the COVID19 Call Center upon arrival on Monegasque territory (reachable at 92.05.55.00 from 8:00 a.m. to 8:00 p.m. Monday to Sunday / or at covid19@gouv.mc) and provide the following information:

- First and last name
- Nationality
- Domiciliation or address in the Principality
- professional situation
- Origin
- Date of departure
- date of return / arrival
- Phone number
- Mail address

The person will be subject to a quarantine measure taken by the Director of Health Action.

This quarantine can be avoided if the person justifies carrying out a PCR with negative result or, provided that the person is asymptomatic, carrying out an antigen test with negative result, (at most 72 hours before his arrival) carried out in his country of origin.

The quarantine can be shortened if the person carries out a PCR test to be performed in a medical biology laboratory (laboratory in the Principality of Monaco appearing on this list) or for asymptomatic people, if they perform an antigen test on arrival (from a dispensary, a doctor, a nurse appearing on this list) and that the result is negative. If the antigen test is positive, the person should perform a PCR test in one of the above-mentioned laboratories.

In the event of a positive PCR, or if the person refuses to be tested, the quarantine will be maintained.

All people entering this procedure should, in the event of the onset of symptoms, immediately contact the COVID19 Call Center, reachable at 92.05.55.00 from 8 a.m. to 8 p.m. Monday to Sunday or on 18 or 112 outside of these hours.
